Jul 26	8	852	170.4%	48	4	2	4
Total	852	852	170.4%	3,694	93	93	472

Shaded rows are months in which cumulative consumption exceeded the 500-ticket entitlement. Active-users and distinct-titles totals are de-duplicated across the period, so they do not equal the column sums.

3 · User base

93 distinct EFU users generated KPIS across 98 active days. Adoption is broad but consumption is concentrated: the ten heaviest users account for 46.4% of all tickets.

4 · Unique job titles

Of 843 titled requests, **472 distinct titles** were submitted — 285 used exactly once and 187 submitted more than once. Roughly 44% of requests re-ran a title already seen, largely draft-and-refine cycles rather than new roles.

Title composition

Titled requests	843
Distinct titles	472
Titles used once	285
Titles re-submitted	187
New titles in June 2026	307
Requests with no title	9

Structured job descriptions

21 requests were submitted on EFU's structured JD template, which carries an explicit Position Title and Designation. Titles captured there:

Fluctuations & Coordinator	6
Sales Administration Section Head	3
Life Underwriter	2
Manager	2
Associate Claims Examiner	1

Designations recorded: Assistant Manager (9), Executive Officer (7), Deputy Manager (3), Manager (2).

MOST RE-SUBMITTED TITLES	REQUESTS	USERS
Job Responsibilities for	25	2
PART 1: POSITION	15	3
1. Complete 100%	10	1
# Department KPI	9	5
Continues Improvement Strategy	9	4
Improve Brand Equity	8	3
Your Objectives Weightage	8	2
PERFORMANCE GOALS 2026	6	2

The title is captured by the platform from the opening words of each submitted request, so a repeated title indicates the same source document re-run — not necessarily the same role.

BASIS OF PREPARATION

- Ticket = one KPI-generation request.** 852 requests were submitted; 838 returned KPIS and 14 returned none. Utilisation is stated on all 852 requests; on successful requests only it is 838 (167.6%).
- Tickets purchased (500)** is a contract figure supplied separately — the raw data sheet holds no entitlement or commercial fields.
- Users** are distinct email addresses in the **KPIS** sheet. All 852 requests sit under **company_id 630** on the efulife.com domain.

- Job titles** are taken from the **title** column. This value is generated by the platform from the opening words of the submitted request rather than entered as a role name, so it is a reliable count of *distinct submissions* and an approximate count of distinct roles. Only 21 requests used the structured JD template that carries a true position title.
- Figures cover 30 Sep 2025 to 21 Jul 2026. KPI detail for Sep–Oct 2025 is not present in the **Data** sheet, so those two months show 8 requests with no KPI rows.
